Such a function would be fairly regarded by a physicist as pathological, and he is interested in a much narrower class of functions, roughly speaking such as can be represented by graphs. 1960 *New Scientist* 25 Aug. 537/2 The term 'pathological functions' does not name any specific functions... It is applied rather informally to functions whose behaviour appears delinquent to those who expect mathematical functions to correspond only with physical events or, conversely, to possess only properties that can be represented by a graph or in a computer. Often the 'pathological' features concern continuity and smoothness. 1968 FOX & MAYERS *Computing Methods for Scientists & Engineers* ix. 179 Examples could be constructed of pathological repeated inaccurate consistency. 1971 D. Even at that time, when departments of pathology were beginning to be usual in medical schools and several specialised journals included the word in their titles, that was a little out of date... The word was already used chiefly for practitioners of laboratory medicine. By the thirties it had differentiated further: non-specialised laboratory doctors called themselves 'clinical pathologists', but used alone the word was increasingly limited to practitioners of the oldest branch of the trade, morbid-anatomy-histopathology. The N.H.S. has partly reversed this trend, advertising posts, for instance, as 'pathologist with a special interest in bacteriology'. The Royal College of Pathologists goes even further, being anxious to include the non-medical biochemists, though there is..a backwoods faction which challenges the propriety of calling anyone non-medical a pathologist. 1977 *Role & Membership of College* (R. College of Pathologists) 5 The pathologist can be defined as a medical (or dental) graduate who has ultimate responsibility for the diagnostic tests performed in the pathology laboratory and for the advice given to clinicians on the selection and interpretation of tests.

‖**patois** (patwa), *sb.* (*a.*) [F.; 'origin unknown' (Hatz.-Darm.), see conjectures in Diez and Littré.]

a. *Properly*, a dialect (esp. in France or French Switzerland) spoken by the common people in a particular district, and differing materially from the literary language. In England, sometimes used *loosely* as a contemptuous designation for a provincial dialect or form of speech.

French scholars distinguish *dialects* as the particular forms presented by a language in different regions, so long as there does not exist a common written language. When a common language has become established as the medium of general literature, the dialects lose their literary standing and become *patois*.

2. *Sociol.* A term used by Max Weber to designate a traditional type of social structure in which the chief or ruler maintains authority through his officials, army, etc., who are retained by him and whose loyalty is to him personally.

1946 GERTH & MILLS tr. M. Weber in *From Max Weber* (1947) xi. 297 As a rule, this meant that princely prerogatives became *patrimonial* in nature. Patrimonialism can also develop from pure patriarchism through the disintegration of the patriarchical master's strict authority. **1947** HENDERSON & PARSONS tr. *Weber's Theory Social & Econ. FISCHOFF et al. tr. *Weber's Econ. & Society* I. iii. 232 Where domination is primarily traditional, even though it is

In this use, at first, as in French (see Littré), with 'good', 'true', 'worthy', or other commendatory adjective: cf. 'good citizen'. 'Patriot' for 'good patriot' is rare before 1680. At that time often applied to one who supported the rights of the country against the King and court.

patron ('peɪtrən), *sb.* Forms: 3-6 patroun, 4-7 patrone, 5 patorne, 3- patron. [ME. *patroun*, a. OF. *patrun* (12th c.), *patron* (13th c.), = Pr. *padron*, *padro*, Cat. *padró* , Sp. *patron* (*padron*), Pg. *patrono*, It. *padrone* (†*patrone*), ad. L. *patrōn-us* protector, defender, patron, deriv. of *pater*, *patr-em* father.

L. *patronus* had the senses of protector and defender of his clients (viz. of individuals, of cities, or provinces); also, the former master of a freedman or freedwoman; an advocate or defender before a court of justice, or, generally, of any person or cause. In med.L. and Romanic it acquired the senses of patron saint, patron or advowee (*advocatus*) of a church, and that of lord or master, in many specific connexions; also that of exemplar, pattern. Most of these senses are represented in Eng. *patron*, but the order in which they were taken into Eng. does not correspond to that of their appearance in Latin and Romanic, sense 4, 'patron of a church', being the earliest to be adopted. The order here followed is one of convenience; the chronological order may be seen from the quotations. The sense PATTERN is now differentiated in spelling, and is treated as a distinct word.]

[*Note.* According to the Spanish Academy, *pavana* (found in D. Pisada 1552) is a derivative of Sp. *pavo* peacock, 'in allusion to the movements and ostentation of that bird'; so Chambers 1727, from *Dict. Trévoux* 1721, 'a grave kind of dance, borrowed from the Spaniards, wherein the performers make a kind of wheel or tail before each other, like that of a peacock: whence the name'; so in M. Compan, *Dict. de la Danse* 1787, Littré, etc. See also Elyot's *Governor*, ed. Croft, I. 231, 241 notes, *Gloss.* II. 580; and cf. the German name *Pfauentanz* 'peacock-dance'. Others have attributed to the dance an Italian origin, and viewed *pavana* as reduced from *Padovana* 'Paduan' (which occurs in A. Rotta 1546); a 17th c. MS. collection of airs and dances by Dowland, Holborne, and others, in Camb. Univ. Lib., Dd. 4. 23 contains (near the end) a piece entitled *Padouana de la Milanessa*. But the phonetic difficulties in identifying the two words are serious; and they are prob. distinct terms, which may afterwards have sometimes been confused by those who knew the history of one of them only: cf. e.g. J. B. Besardus *Thesaur. Harmon.* (Cologne 1604) Pref.]

[Originally *papaya*, *papay*, a. Sp. and Pg. *papaya*, *papayo* (the tree), adopted from a Carib dialect.

Oviedo, 1535, gives *papaya* as the name in Hispaniola; Breton, *Dictionnaire Caraïbe*, 1665, has *ababai* papaye-tree; Gilij, 1782, says that some form of *papaia* is the name among all the peoples of the Orinoco, that in Ottomac (Venezuelan Carib) it is *pappai*. From America the name was taken with the plant in the 16th c. to the East Indian archipelago, where *papaya* now occurs in Malay. The immediate source of the Eng. forms *papa*, *papaw*, *pawpaw*, etc., does not appear. F. *papaye* is from Sp.]

pax[1] (pæks). Also 6 pex. [a. L. *pax* peace, in Christian L. also the kiss of peace.]

‖**1. a.** The Latin word meaning 'peace'. *Obs.*

Cf. Pliny, *Nat. Hist.* XXVII. 3 immensa Romanae pacis maiestate.

The Latin word is familiar in certain legal phrases, as *Pax Dei*, *Ecclesiæ*, *Regis*, the peace of God, the Church, the king's peace; so *pax Romana*, the peace which reigned between nationalities within the Roman empire (cf. also sense e).

When the Avesta character is used for this transcription, the result is called 'Pázend'; when the Persian (*i.e.*, the Arabic) character is adopted, the term 'Pársí' is often substituted. In either case the product is simply an archaic or archaistic... form of 'modern' (*i.e.* post-Muhammadan) Persian, from which the whole Aramaic element has disappeared. **1934** *Trans. Philol. 'pea-jacket. Also 8 pay-, 9 pee-, P-jacket. It is very common in the New Jersey Archives, 1725–40.

Peak (pi:k), *sb.*[1] Forms: 1 Péac (in Anglo-L. records 1–2 Pech, 2 Pec); 3–4 pek, 6 Peke, 7 Peake, 7– Peak. [OE. *Péac* (only in comb. *Péaclond*) of unknown origin: perh. British.

The name Peak's Arse (OE. **Péaces ærs*, Domesday *Pechesers*), applied to the Peak Cavern, has suggested a conjecture that *Péac* may have been a name for a demon (cf. the later *Devil's Arse*) cognate with OE. *Púca*, PUCK. Cf. other place-names, as OE. *Péaces-del* (Kemble *Cod. Dipl.* dccxxii), *Pechesdon* (Domesday) now Pegsdon, Bedfordshire. From the 17th c. the name has naturally been associated with PEAK *sb.*[2]; but the history of the latter makes any etymological connexion impossible.]

1. The name of the hilly district in the north-west of Derbyshire, England; divided into the High Peak and the Low or Lower Peak, approximately corresponding to the modern Hundreds of High Peak and Wirksworth respectively.

In 12–13th c. the word seems to have been apprehended as the proper name of the Castle Hill at Castleton, under which is the Peak Cavern. The post-Conquest use of *Peak* in the sense of OE. *Péaclond* seems to have arisen through the application of the name of Peverel's castle to the district thence governed. The Ordnance Map, without any warrant in local usage, gives the name 'The Peak' to an elevated plateau or mountain mass in the High Peak Hundred (see quot. *1874*), in which it is followed by geography books, etc.

peak (pi:k), *sb.*[2] Forms: 6 pek, peke, 6–7 peake, 8 peek, 7– peak. [Known from 16th c. as a later equivalent of PIKE *sb.*[1]; in 15th c. the deriv. *peked*, PEAKED, appears as an equivalent of PIKED. The phonetic relations are difficult to understand; but cf. MLG. *pêk*, *peik*, 'pick, pike, pointed iron instrument'. It is notable that in sense 1, *peak* is identical with *beak*. (Ir. *peac* is from Eng.).

The connexion between PIKE *sb.*[1] and *peak* appears in the adjs. *piked*, *peaked*. From *pike*, the long point of a 14th c. shoe, instanced in Wyclif *c* 1380, we have *piked schone* in Langland *P. Pl.*, 1377. These appear *c* 1450–60 as *pekyd*, *peked schone*, being the first appearance of the *peke-*, *peak-* form. *Peake* itself is exemplified in Palsgr., 1530. In the 16th c. the forms *pike* and *peak* appear to have gone apart in sense, *pike* being confined more to a sharp piercing or pricking point (perhaps under the influence of PIKE *sb.*[3], the weapon, introduced early in that century), while *peak* is more associated with the notion of a projecting point, not specially sharp or acuminate. *Peak* as a pointed mountain-top, or conical mountain (sense 5) is a still later (17th c.) substitution for an earlier *pike*.]

pearl (pɜːl), *sb.*[1] Forms: 4–6 perle, peerle, 5 perl, (perll, perell, -ill, perril, 6 pearel, *Sc.* peirl(e, peirll), 6–7 pearle, 5– pearl. [ME. a. F. *perle* (also *pesle*, *pelle*, *peele*, *pele*, 13–14th c., Godef.) = Pr., It., Sp., Pg. *perla*, Pg. also *perola*, med.L. *perla* (J. de Vitry, *a* 1244), *pella*, *perula*, *perulus*. From Romanic also OHG. *perala*, *berla*, MHG. *perle*, *berle*, Ger. *perle*, MLG. *perle*, *parle*, MDu. *pārele*, Du. *paarl*. Ulterior etymology unsettled.

Many identify the word with med.L. *pĕrula*, in Isidore *pirula*, dim. of L. *pirum*, Com. Rom. *pĕra* PEAR, used in reference to shape. Others think *perla* altered from *perna*, the form in Neapolitan and Sicilian dial., and found in Sicilian Lat., in *Constitut.* of Frederick King of Sicily, early 13th c. (Du Cange), which they would identify with L. *perna*, ham, leg of mutton, also a leg-of-mutton-shaped marine bivalve, mentioned by Pliny. A dim. of the latter, **pernula*, conjectured in Du Cange (ed. 1762) is favoured by Gröber. Another suggested source is L. *pilula* globule, whence, by dissimilation of *l*..*l* to *r*..*l*, **pirula* (for which Littré compares Venetian and Veronese *pirola* from *pilula*). See Diez, Littré, Körting, etc.]

I. 1. a. A nacreous concretion formed within the shell of various bivalve molluscs around some foreign body (e.g. a grain of sand), composed of filmy layers of carbonate of lime interstratified with animal membrane; it is of hard smooth texture, of globular, pear-shaped, oval, or irregular form, and of various colours, usually white or bluish-grey; often having a beautiful lustre, and hence highly prized as a gem; formerly also used in medicine. See also MOTHER OF PEARL, SEED PEARL.

The chief source is the Pearl-oyster, *Meleagrina margaritifera*, of the Indian Seas, but pearls are yielded by many other marine, as well as by some freshwater shells, the pearl-mussels, *Unionidæ*.

A mixture of about $\frac{2}{3}$ ferrite and $\frac{1}{3}$ cementite. 1889 *Nature* 14 Nov. 37/2 Prof. Howe, of Boston,..even suggests mineralogical names, such as 'cementite', 'perlite', 'ferrite', for the various associations of carbon and iron. 1900 *Engineering Mag.* XIX. 752/1 This substance, which has received the name of pearlite, is an intimate mixture of thin lamellæ of ferrite and yet thinner lamellæ of a chemical combination of iron and carbon, Fe_3C, which bears the name of cementite. Low-carbon irons and steels are composed of a conglomeration of ferrite and pearlite, but when the carbon reaches about 0·8 per cent. the ferrite granules disappear, and only the pearlite remains. 1966 C. R. TOTTLE *Sci. Engin. Materials* x. 228 A two-phase alloy will tend to corrode more readily because an electrochemical cell will be set up between the different areas. Mild steel, containing ferrite (pure iron) and pearlite (a eutectoid, itself two-phase), shows this. 1977 *Sci. 1908 *Biometrika* VI. 4 Consequently a curve of Prof. Pearson's Type III may be expected to fit the distribution of s^2. 1927 H. L. RIETZ *Math. Statistics* iii. 58 The method of moments plays an essential rôle in the Pearson system of frequency curves. 1936 *Statistical Res. $$\text{skewness} = \frac{\text{mean} - \text{mode}}{\text{standard deviation}} \ldots$$

Statistical Terms* 215 The product-moment coefficient of correlation is sometimes referred to as the Pearson coefficient of correlation because of K. Pearson's part in introducing it into general use. 1973 L. D. PHILLIPS *Bayesian Statistics* x. 207 The correlation coefficient (or Pearson product-moment correlation coefficient, as it is sometimes called) is usually designated by r and is defined as $r = \frac{\Sigma Z_X Z_Y}{N-1}$. *Ibid.* xii. 294 Transform the ranks into normal scores, compute the Pearson-r between the pairs of scores and use the inference method just discussed.

1912 *Jrnl. Exper. Zool.* XIII. 203 Pearson's test depends upon a variable $\chi_2[sic] = S\{(m_r - m_r')^2/m_r\}$ where m_r is the theoretical frequency and m_r' the observed. 1969 H. O. LANCASTER *Chi-Squared Distribution* ix. 175 With several degrees of freedom, for class frequencies of 5 or more, the distributions of the Pearson χ^2 approximate satisfactorily to the asymptotic or theoretical χ^2 distributions.

JACKSON *Crime Doctors* 25 Simpson measured the only intact bone he had —the upper part of the left arm—and, using Pearson's formula, concluded that the bones were those of a woman who had been slightly over five feet tall.

1. a. One who lives in the country and works on the land, either as a small farmer or as a labourer; *spec.* one who relies for his subsistence mainly on the produce of his own labour and that of his household, and forms part of a larger culture and society in which he is subject to the political control of outside groups; also, loosely, a rural labourer.

In early use, properly only of foreign countries; often connoting the lowest rank, antithetical to *noble*; also to *prince*. Although modern sociologists agree that a 'peasant' works the land, the more wealthy peasants may also be land-owners, rentiers, hirers of labour, etc., and in these capacities share interests with completely different social groups. Hence in the analysis of many rural societies divisions within the class frequently have to be made.

PAUL tr. *Marx's Eighteenth Brumaire of L. Bonaparte* vii. 137 The interests of the peasants no longer coincide, as during the reign of the first Napoleon, with the interests of the bourgeoisie, with the interests of capital. There is now a conflict of interests. The peasants, therefore, find their natural allies and leaders in the urban proletariat, whose mission it is to subvert the bourgeois order of society. 1927 M. J. OLGIN tr. *Engels's Peasant War in Germany* 18 The small peasants (bigger peasants belong to the bourgeoisie) are not homogeneous. They are either in serfdom bound to their lords and masters,..or they are tenants, whose situation is almost equal to that of the Irish. 1933 E. & C. PAUL tr. *Stalin's Leninism* II. 205 In the conditions prevailing in our country, the peasantry consists of various social groups,..the poor peasants, the middle peasants, and the kulaks. It is obvious that our attitude to these various groups cannot be identical. The poor peasant is the *support* of the working class, the middle peasant is the *ally*, the kulak is the *class enemy*—such is our attitude to these respective social groups. 1934 *Encycl. Social Sci.* XII. 48/2 The term peasantry has undergone many changes in meaning in the past and is still subject to various interpretations. Common to all the shifting meanings, however, is a view of the peasant as a tiller of the soil to whom the land which he and his family work offers both a home and a living. 1938 tr. *Lenin's Sel. Wks.* X. 223 The big peasants (*Grossbauern*) are the capitalist *entrepreneurs* in agriculture who..employ several wage workers and are connected with the 'peasantry' only by their low cultural level, habits of life and the manual labour they themselves perform on their farms. These constitute the largest of the bourgeois strata, and they are the.. enemies of the revolutionary proletariat. 1948 A. L. KROEBER *Anthropol.* (rev. ed.) vii. 284 Peasants are definitely rural—yet live in relation to market towns; they form a class segment of a larger population which usually contains also urban centers, sometimes metropolitan capitals. 1951 BONNER & BURNS tr. *Marx's Theories of Surplus Value* B. v. 192 In the capitalist mode of production the independent peasant or handicraftsman is sundered into two persons. As owner of the means of production he is capitalist, as worker he is his own wage worker. 1954 tr. *Mao Tse-tung's Sel. Wks.* I. 139 The rich peasant as a rule possesses land... The exploitation the rich peasant practises is chiefly that of hired labour. *Ibid.*, In many cases the middle peasant possesses land. The middle peasant relies wholly or mainly on his own labour as the source of his income. *Ibid.* 140 As a rule the poor peasant has to rent land for cultivation and, exploited by others, has to pay land rent and interest on loans and hire out a small part of his labour. 1956 R. REDFIELD *Peasant Society & Culture* i. 27 Those peoples are to be included in the cluster I shall call peasants who have..this in common: their agriculture is a livelihood and a way of life, not a business for profit. 1966 E. WOLF *Peasants* 3 Peasants..are rural cultivators whose surpluses are transferred to a dominant group of rulers that uses the surpluses both to underwrite its own standard of living and to distribute the remainder to groups in society that do not farm but must be fed for their specific goods and services in turn. 1969 *Internat. Social Sci. Jrnl.* XXI. 286 A peasant may be at one and the same time owner, renter, share-cropper, labourer for his neighbours and seasonal hand on a near-by plantation. Each different involvement aligns him differently with his fellows and with the outside world. 1971 tr. E. Feder in T. Shanin *Peasants & Peasant Societies* vii. 90 But while the landed elite [in Latin America] has no interest in the peasants' aspirations and keeps aloof from their world, it is still keenly aware of its obligations to keep the peasants in check and subservient. 1975 J. A. HELLMAN tr. *Stavenhagen's Social Classes in Agrarian Societies* v. 65 A useful distinction is sometimes made between tribal peoples, peasants, and modern farmers... In contrast to tribal or primitive peoples, peasant societies do form part of wider economic, social, and political units.

Because of the two main classes of which our society is composed, the peasantry is a class whose economy is based on private property and small commodity production. Because the peasantry, as long as it remains a peasantry, living by small commodity production, will

throw up capitalists from its ranks. **1934** *Encycl. DEUTSCHER *Marxism in our Time i.* 28 We see all over the West the disappearance of those middle classes that were supposed to constitute the conservative foundation of capitalism; of the small-owning, small-holding peasantry. **1975** J. A. HELLMAN tr. *Stavenhagen's Social Classes in Agrarian Societies* v. 66 For some students, peasantries are merely holdovers from pre-capitalist times, which tend to disappear as capitalism develops. While this may be the case in Western Europe, the situation in the underdeveloped countries is quite different. Here we still have hundreds of millions of peasants..who are well integrated into the colonial or underdeveloped capitalist system and who, if present trends continue, will maintain peasant characteristics for many generations.

[*Nate.* As *pete* has from the beginning been applied in the north, not to the substance, but to a shaped and prepared piece of it (cf. the expressions 'to make peats', 'peat-making'), the suggestion is offered that we may have in it one of several instances in which a word orig. meaning 'piece' has become at length the term for a piece of some particular substance. If this be so, there may be etymological connexion with the stem *pette-* which gave med.L. *petia, pecia* (:—**pettia*), It. *pezza*, F. *pièce*, 'piece', and is held to be of Celtic origin (Thurneysen *Keltoraman.* 20). The Old Celtic entries in the *Baak af Deer*, have *pet*, genit. *pette*, in sense 'portion, piece', with which Stokes, *Gaidelica* (ed. 2) 120, compares OIr. *pit* portion of food (in *terc-fit, leth-fit*). (This word is supposed to have passed into Goidelic from a Brythonic dialect: cf. Welsh *peth* portion.)]

peck (pɛk), *sb.*[1] Forms: 4 pec, 4–6 pek, pekke, (5–6 peke), 5–7 pecke, (7 *Sc.* pect), 5– peck. [ME. *pek*, = OF. *pek* (13th c. in Godef., only one instance), frequent in AF., also latinized as *peccum* (or ? *-us*), *pekka*; ulterior history unknown.

Godefroy's OF. instance refers to oats for horses, which was also a chief use of *pek* in ME. In this respect *pek* was synonymous with F. *picotin* 'a pecke or the fourth part of a boisseau . . used only in the measuring of oats' (Cotgr.), a horse's feed of oats (Scheler); in med.L. *picotinus*. But the latter was evidently a deriv. of med.L. *picotus*, *-ta* a liquid measure, in OF. *picote* a wine-measure (14th c. in Godef.). The radical part of these words may be cognate with *pek*. The formal resemblances of *picote* to F. *picoter*, 'to prick often, to peck as a bird', and of *pek*, *peck* to *pek*, *pekke*, PECK *v.*[1], is notable; but *peck* sb. is known long before the vb., and cannot easily be derived from it.]

1. A measure of capacity used for dry goods; the fourth part of a bushel, or two gallons. The imperial peck contains 554·548 cubic inches, that of the United States 537·6.

The Scottish peck was the fourth part of the firlot and contained 4 lippies = 553·5625 cubic inches for wheat, but 807·55 for barley, rye, pulse, salt, and other commodities. In England, the peck formerly varied greatly according to locality and to the commodity measured. See *O.C. and Form. Words* (E. Dial. Soc.) 173.

pedal ('pɛdəl), *sb.* [app. a. F. *pedale*, used by Rabelais in the sense 'feet' or 'trick with the feet', by Oudinot 1642, of the pedals of the organ, ad. It. *pedale* a foot, foot-stool, footstalk, stock of a tree, etc. (Florio), *pedale a'organo* 'the low key of organs' (Baretti); f. L. *pedāl-is* adj.: see next. The English use of the word by Cotgrave in 1611 before this sense is recorded in Fr. is notable.]

1. A lever worked by the foot, in various musical instruments, and with various functions.

a. In the organ: (*a*) Each of the (wooden) keys played upon by the feet, resembling those of the manuals in form and arrangement, but much larger, together consitituting the *pedal keyboard* or *pedal-board*, and usually operating upon a separate set of pipes of bass tone (*pedal-pipes*) forming the *pedal organ* (see ORGAN *sb.*[1] 2 d). (*b*) A foot-lever for drawing a number of stops out or in at once (COMBINATION-*pedal* or COMPOSITION-*pedal*). (*c*) The foot-lever by which the swell-box is opened and shut (SWELL-*pedal*). (*d*) Any one of various foot levers occasionally used, e.g. for coupling two keyboards. (*e*) Short for *pedal organ* or *keyboard*.

It reinforces the strength of the Swell to a far greater extent than by the 'crescendo' pedal... Other subsidiary pedals are occasionally introduced.

b. In the pianoforte, etc.: (*a*) A foot-lever for raising the dampers from the strings, thus sustaining the tone and rendering it fuller (*damper pedal*, often loosely called *loud* or *forte pedal*). (*b*) One for softening the tone (*soft* or *piano pedal*), either by shifting the hammers so as to strike only one or two strings instead of three for each note, or by diminishing their length of blow, or by interposing a strip of cloth between them and the strings (*celeste pedal*); see also SOFT PEDAL. (*c*) Any one of various others occasionally used; e.g. the *sustaining-pedal* for sustaining a particular group of notes after they are struck; and several in late harpsichords and early pianofortes for modifying the tone, or for special effects. (*d*) Each of the keys of a pedal-board like that of an organ, sometimes attached to a pianoforte or harpsichord.

c. In the harp: Each of a set of seven foot-levers by which the pitch of the notes may be raised either one or two semitones by stopping the strings at different points, thus enabling the performer to play in any key.

1771 BURNEY *Pres. St. Music* (1775) I. 59 *note*, This method of producing the half-tones on the harp, by pedals, was invented at Brussels, about fifteen years ago, by M. Simon. **1880** A. J. HIPKINS in Grove *Dict. Mus.* II. 683 In the Harp the pedals are not keys .. but it is their province to alter the pitch in two gradations of a semitone each.

d. Sometimes applied to the treadles by which the bellows are worked in a harmonium or reed-organ.

2. a. A lever worked by the foot in various machines or mechanical contrivances; a treadle: *esp.* in a bicycle or tricycle.

4. *Mus.* a. A note (regularly either tonic or dominant) sustained (or reiterated) in one part, usually in the bass, through a succession of harmonies some of which are independent of it; in organ-music usually sustained by holding down a pedal. Also *transf.*

Also called *pedal-point* (see 7) or *organ-point*. *double pedal*: two notes (regularly tonic and dominant) so sustained simultaneously. *inverted pedal*: a note so sustained in any other part than the bass, esp. in the highest part.

pediment¹ ('pɛdɪmənt). Forms: α. 7 peremint, peri-, perriment. β. 7 peda-, pede-, 8 pedie-, piedment, 8– pediment. [An alteration of *periment, peremint*, said to be a workmen's term, and 'corrupt English'; of obscure origin: see *note* below.]

1. a. A word applied since the 17th c. to the triangular part, resembling a low gable, crowning the front of a building in the Grecian style of architecture, especially over a portico. It consists of a flat recessed field framed by a cornice and often ornamented with sculptures in relief. Also applied to similarly-placed members in the Roman and Renaissance styles, whether triangular, semicircular, or of other form, also to those of similar shapes placed over niches, doors, or windows. Hence, in *Decorative art*, Any member of similar form and position, as one placed over the opening in an ironwork screen, etc.

b. *Geomorphol.* A broad, gently sloping, eroded rock surface that extends outwards from the abrupt foot of a mountain in arid and semi-arid regions and is usu. slightly concave and partly or wholly covered with a thin layer of alluvium

This is not the sense in quots. 1882, where the word denotes steep rock slopes roughly triangular in shape, more like architectural pediments.

Survey* No. 730. 52 The mountains of the Papago country rise from plains which are similar in form to the alluvial plains that commonly front mountains of an arid region, but large parts of the plains are without alluvial cover and are composed of solid rock. These plains are called 'mountain pediments', a term suggested by McGee's usage. *Ibid.* 58 A mountain pediment buried in alluvium may be called a concealed pediment. **1933** [see panfan]. **1935** [see pediplain]. **1960** B. Hallam *Planet Earth* 85 The low-angle (generally less than about 8°) concave surfaces which coalesce to form the pediplains are called pediments. *Ibid.*, More recently it has been argued that pediments develop through surface and subsurface weathering.

To distinguish this less advanced feature from the broad saddle plains.. we may call it a pediment pass. **1974** C. H. CRICKMAY *Work of River* viii. 206 In a few places, the upper end of the pediment is the smoothly rounded summit of a pediment pass, or rock floored gap through a low mountain ridge.

[Note. *Pediment*, in Evelyn *pedament*, in Randle Holme *pedement*, has the appearance of a derivative in *-ment*, of L. *pēs*, *pedi-* 'foot'. But L. *pedāmentum* was a 'vine-stake' or 'prop', It. *pedamento* 'any foundation, groundworke, base, or footing' (Florio): senses with which the modern 'pediment' has no connexion. Evelyn's word was evidently an attempted improvement upon the workmen's *periment* or *peremint*, which the translator of *Hypnerotomachia* considered to be 'corrupt English' for *perimeter*. But the corruption of *perimeter* to *periment* is difficult to imagine, and the connexion of sense (see Willis *Archit. Nomencl. Midd. Ages* 37 *note*) is far-fetched; and it seems more likely that *peremint* was a workman's corruption of *pyramid*, which a triangular gable sometimes resembles in section, and which is actually pronounced *periment*, or *purriment* by the illiterate in some districts of England (e.g. in West Somersetsh.) at the present day (1904). This would also better explain 'the peremint of the Coundite' in 1601-2 above, since the Fountain in question had no 'pediment', but a curved roof in form of an ogee cupola. If this is the derivation, we have the series *pyramid*, *peremint*, *periment*, *peda-*, *pede-*, *pediment*.]

pedion ('pɛdɪɒn). *Cryst.* Pl. pedia. [a. Gr. πεδίον a plain, a flat surface.] A term introduced to denote any face of an anorthic crystal; each face being bounded by a set of faces of which no two are necessarily parallel, and which are connected only by a law of rational indices.

1899 W. J. LEWIS *Crystallogr.* xi. 148 Each form consists of a single face, and will be called a *pedion*.

1. An arachnid of the group *Pedipalpi*, distinguished by large pincer-like palps; formerly including the true scorpions, now restricted to the *Phrynidæ* and *Thelyphonidæ*, or *whip-scorpions*.

1835 KIRBY *Hab. & Inst. Anim.* II. xvi. 89 In the Pedipalps.. the first pair of legs of Octopods seem to wear the form and in some measure to discharge the functions of antennæ.

2. Each of the pair of palps or feelers attached to the head just in front of the ambulatory limbs in most Arachnids; in some cases, as in scorpions, large and pincer-like or chelate.

pediplain ('pɛdɪpleɪn). *Geomorphol.* [f. PEDI(MENT[1] + PLAIN *sb.*[1]] An extensive plain formed in a desert by the coalescence of neighbouring pediments (believed to represent a late stage in the cycle of erosion in arid and semi-arid climates). Cf. PEDIPLANE.

1935 MAXSON & ANDERSON in *Jrnl. Geol.* XLIII. 94 Widely extending rock-cut and alluviated surfaces of this type formed by the coalescence of a number of pediments and occasional desert domes may be called 'pediplains'. **1968** C. R. TWIDALE *Geomorphol.* xi. 308 Pediplains,..like peneplains, are surfaces of low relief, but generally differ from the latter in a number of respects. They are smoother, and less dissected.., they are mostly dominated by concave profiles, and meet the adjacent uplands in a piedmont angle. **1973** [see PEDIMENTATION]. **1974** C. H. CRICKMAY *Work of River* viii. 211 Where pediments are sufficiently extensive to be conjoint and broadly continuous, the whole is termed a pediplain or a panfan. **1977** A. pediplane ('pɛdɪpleɪn). *Geomorphol.* [f. PEDI(MENT[1] + PLANE *sb.*[3]] A piedmont slope in arid and semi-arid regions comprising a pediment and a peripediment (or just one of these, if the other is not present). Cf. PEDIPLAIN.

1942 A. D. HOWARD in *Jrnl. Geomorphol.* V. 11 The writer proposes the term *pediplane* as a general term for all degradational piedmont surfaces produced in arid climates which are either exposed or covered by a veneer of contemporary alluvium no thicker than that which can be moved during floods. *Ibid.* 13 In some localities the up-land rocks may be extremely resistant or the basin rocks may be extremely weak... In such regions the pediplane will truncate basin sediments almost exclusively and will consist largely of peripediment. **1948** *Bull. Geol. Soc. Amer.* LIX. 370 In regions of rising base level the pedi-plane will be made up for the most part of a peripediment, and the pediment as a near-mountain zone cut on solid rock is sometimes overlooked. **1955** *Proc. Geologists' Assoc.* LXVI. 173 The combined pediment and peripediment may then be describd as a pediplane (Howard, 1942).

pedipulate (pɪ'dɪpjʊleɪt), *v. nonce-wd.* [f. L. *pēs*, *pedi-* foot, after *manipulate*.] *trans.* To work with the feet. So **pedipu'lation**, **pe'dipulator**.

pedlar, peddler ('pɛdlə(r)), *sb.* Forms: 4-5 pedlere, 5 pedlare, 5-6 pedeler, 6 peddelar, 7- (9- chiefly *U.S.*) peddler, 6- pedler, pedlar. [Origin obscure.

The 14th c. *pedlere* has the form of an agent-noun, but occurs long before there is any trace of the vb. *pedle*, PEDDLE, in any sense, from which therefore it cannot be assumed to be derived. It is app. synonymous with PEDDER, and may possibly have been a modification of that word (cf. Scotch *tinkler* for *tinker*), or formed on the same basis *ped.* But the Promptorium (*c* 1440) has both *pedder* and *pedlere* with distinct explanations, and without any reference to each other.

The spelling *peddler* is usual in the U.S., and is occas. found in the U.K., esp. in sense 1 d.]

pedling: see PEDDLE, PEDDLING.

pedo- ('pɛdəʊ, pɛ'dɒ, pɪ'dɒ), or before a vowel **ped-**, repr. Gr. *πέδον* ground, earth, is used in the sense 'soil' in PEDOLOGY and other technical terms.

pedo-: see PÆDO-.

pedocal ('pɛdəʊkæl). *Soil Sci.* [f. PEDO- + CAL(CIUM.] A soil that contains a layer of accumulated calcium carbonate (generally characteristic of dry climates). Cf. PEDALFER.

1928 C. F. MARBUT in *Proc. & Papers 1st Internat. Congr. Soil Sci.* IV. 20 A formal definition of the two groups is as follows: I. Includes all soils in whose maturely developed profiles no higher percentage of lime carbonate is found than in the parent material beneath them and in which either a shifting or an accumulation of sesquioxide and in many cases both, has taken place. II. Includes all soils with fully developed profiles in which lime carbonate is found on some horizon in the solum in higher percentage than in the parent geological formation beneath... The name *Pedalfers* is suggested as a designation for the soils of group I, and *Pedocals* for those of group II. **1938** *Nature* 21 May 925/2 It has been generally accepted that the climate of Great Britain is too wet for pedocals to develop. **1949** F. J. PETTIJOHN *Sedimentary Rocks* xii. 384 The pedalfers and pedocals are subdivided into many soil types. **1968** [see *halomorphic* adj. s.v. HALO-]. **1972** J. G. CRUICKSHANK *Soil Geogr.* v. 158 Marbut..established a classification that became the most widely known of the schemes based on soil genesis, in which he made the two-fold primary sub-division between the leached soils (pedalfers) and the non-leached (pedocals) freely drained soils. **1977** A. HALLAM *Planet Earth* 179 These ideas were accepted in the USA, and the concepts of pedalfers and pedocals added: pedalfers are leached soils in humid areas where aluminium and iron accumulate in the B horizon, and pedocals occur in more arid regions.

Hence **pedo'calic** *a.*

1928 *Proc. & Papers 1st Internat. Congr. Soil Sci.* IV. 23 Most of the groups of Pedalferic soils in category V were defined by Russian pedologists, but they made no attempt to differentiate the Pedocalic soils on the same basis since the Eurasian conditions do not present an opportunity for doing it. **1938** *Nature* 21 May 925/1 (*heading*) Pedocalic tendencies in soils of southern England. **1941** H. JENNY *Factors Soil Formation* vi. 191 Not all soils that are embraced by the area labeled as pedocals contain lime horizons. Only those soils which have the required normal topography and which have attained sufficient maturity deserve the attribute pedocalic.

pedœuvre (pɪ'd(j)u:və(r)). *nonce-wd.* [f. L. *pedem* foot, after *manœuvre*.] A planned movement or performance with the feet.

1825 COLERIDGE *Aids Refl.* (1873) 193 The bees had recourse to the same manœuvre (or rather pedœuvre).

pedogenesis (pɛdəʊ'dʒɛnɪsɪs). [f. PEDO- + -GENESIS.] Soil formation.

1936 J. S. JOFFE *Pedology* vi. 134 From the point of view of pedogenesis, the classification of the soil-forming processes, in their broad aspects, should hinge on the elements of climate. **1943** *Proc. Soil Sci. Soc. Amer.* VII. 187/1 Most investigations on mechanical separates of the soil have dealt with the physical aspects of the subject, with no relation to pedogenesis and agropedologic implications. **1963** D. W. & E. E. HUMPHRIES tr. *Termier's Erosion & Sedimentation* vi. 135 During pedogenesis (soil formation), the nature of the alteration of the titanium minerals depends more upon chemical diagenetic environmental conditions than on the nature of the parent rock. **1972** J. G. CRUICKSHANK *Soil Geogr.* ii. 42 As part of the role of climate in pedogenesis, its moisture and temperature components also affect the rate of decay and incorporation into the soil of surface organic litter.

Hence **pedoge'netic, -ge'netical** *adjs.* = PEDOGENIC *a.*; **pedoge'netically** *adv.*

1946 *Soil Sci.* LXI. 389 Each soil series..is thus pedogenetically connected with ten other series. **1950** *Ann. Assoc. Amer. pedogenic (pɛdəʊ'dʒɛnɪk), *a.* [f. PEDO- + -GENIC.] Soil-forming

1924 *Geol. Mag.* LXI. 448 (*heading*) The pedogenic processes. [*Note*] I am indebted to my friend Dr. Edward Greenly, F.G.S., for this convenient term, which aptly describes the processes of soil formation and metamorphism. **1936** *Nature* 24 Oct. 729/2 The effect of human interference as a pedogenic factor was raised in the discussion. **1943** [see *palæopedology* s.v. PALÆO-, PALEO-]. **1975** *Nature* 20 Feb. 617/2 The carbonate nodules which occur in the Pleistocene but not in the Holocene portions of the core are regarded as pedogenic and as symptomatic of a soil climate drier than the present one.

4. The general name, in modern writers, for the small towers or fortified dwellings built in the 16th c. in the border countries of England and Scotland, for defence against hostile forays; consisting of a massive square edifice, the ground-floor of which was vaulted, and used as a shelter or refuge for cattle, while the upper part (the access to which was by a door on the level of the first floor, with external ladder or movable stair) was the abode of the owner and his family.

(In this sense, probably orig. short for *peel-house* (see 6), i.e. house defended by a peel (in sense 2). But the name is now applied in many cases in which it has no historical support.) It is evidently akin to sense 3.

Peculiar to houses or castles on both sides of the Scottish border. Generally built between the 13th and 15th centuries.

basis; = *life peer* s.v. LIFE *sb.* 17. Also = *peeress in her own right.*

Peers are of three classes: *peers of the United Kingdom* or *of the realm* (up to 1707 called *peers of England*, from 1707 to 1801 *peers of Great Britain*), all of whom, when of age and not otherwise disqualified, may sit in the House of Lords; *peers of Scotland*, of whom sixteen are elected to each Parliament as representative members to sit in the House of Lords; *peers of Ireland*, of whom twenty-eight representatives are elected for life to the House of Lords. By a declaration of the House of Lords in 1692, Bishops are only lords of Parliament, and not peers.

peer (pɪə(r)), *v.*² Also 6–7 peere, (8 pier). [Known from *c* 1590: of uncertain origin and history.

Exactly the same sense as 1 below was expressed in the 14th c. by PIRE *v.* (app. = LG. *pīren*); and *peer* has accordingly been assumed to be merely a later form or spelling of *pire*. But, besides that there was a clear chronological gap between the two words, *peer* is not a phonetic development of *pire*, and cannot, so far as is at present known, be formally identified with that word; whether there was any irregular or ulterior connexion does not appear. In 15–16th c., *pere*, *peere*, were also ordinary spellings of PEAR *v.* = *appear*; and, in many instances (see senses 2, 3 below) the use of *peer* comes so close to that of *pear* (*appear*), that it is difficult to believe that there was not some blending of the two words, attributable to the fact that when *peer*, to look out, is said of inanimate things, the meaning is that they *appear* as if they were looking out. In several of the Shaksperian uses of *peer* it is difficult to determine whether the things are thought of as looking out, or as just appearing.]

[(Like F. *pélican* (1210 in Hatz.-Darm.), Pr. *pelican*, Sp. *pelicano*, It. *pellicano*) ad. late L. *pelicān-us*, more correctly *pelecānus*, ad. Gr. πελεκάν, applied by Aristotle (in part at least) to the pelican (οἱ πελεκᾶνες οἱ ἐν τοῖς ποταμοῖς γινόμενοι); app. closely related to πελεκᾶς, -ᾶντα woodpecker, perh. f. πελεκᾶν to hew or shape with an ax, πέλεκυς ax, hatchet, from the appearance or action of the bill.

Πελεκάν was also used by the LXX to render the Heb. *qâāth*, in two (or three) of the places in which it occurs (in Eng. versions 'pelican'); in the two others, Isa. xxxiv. 11, Zeph. ii. 14, different Greek words were used, and there the version of 1611 has 'cormorant', but the Revisers of 1885 restore 'pelican' as in Coverdale.]

I. The bird.

1. a. The name now appropriated to a genus, *Pelecanus*, of large gregarious fish-eating waterfowls, remarkable for an enormously distensible membranous pouch which depends from the lower mandible of the long hooked bill and is used for the storing of fish when caught. Two species, *P. onocrotalus*, the Common or White Pelican, and *P. crispus*, the Crested Pelican, are found in South-eastern Europe and adjacent regions, and are the original 'pelicans'; to these the North American species *P. trachyrhynchus* is very closely allied. Other species are found in the West Indies, Africa, India, the Malay Archipelago, and Australia.

In all the quotations down to 14th c., and many latcr, the identification is vague, the bird being itself unknown in England, and the word merely a reflex of *pelicanus* of the Vulgate in Ps. ci(i). 7, *pelicano solitudinis* 'the pelican of the wilderness', which was app. not the pelican of naturalists. In the four other places where the same Heb. word occurs, the Vulgate has *onocrotalus*, a L. name of thc modern 'pelican'. Elsewhcre (*Comm.* in *Sophon.*, op. ed. Villarsi VI. 709) St. Jerome makes two kinds of *onocrotalus*, one the water-bird, the other that of the wilderness ('onocrotalorum, duo genera, aliud aquatile, aliud solitudinis'). So Isidore (*Orig.* XII. vii. 32). These appear in the pseudo-Jerome *Brev. in Psalt.* (Villarsi VII. Appx. 271) as two kinds of *pelicanus* (herc identified with *onocrotalus*); whence, ultimately, in Trevisa, quot. 1398 below.

[Found first in 16th c.: partly (in sense 1) an alteration of the earlier *peletre, peletyr*, PELLETER[1], with changed suffix; partly (in sense 2) an alteration of **peretarie, paretarie*, PARIETARY, L. *parietāria*, It. *paretaria*, F. *pariétaire, paretaire* (f. L. *parietem* wall), by dissimilation of *r . . r* to *l . . r*.

It is not clear whether these two changes of the earlier words were independent of each other, or whether one influenced the other; but the result was that by 1550 or thereabouts both words had become *pellitory*.]
